REMARKS		

SOURCE 25X1X

1. On 11 and 12 August 1950 the Strausberg (H 53/V 15) airfield was occupied by 35 to 40 twin-engine planes and one multi-engine plane which was considerably larger than the twin-engine plane.\*

25X1A

\* Comment. The occupation was confirmed by another source who observed the airfield and photographs of the aircraft there. See Annexes. The large plane seen in the background of the photographs cannot be identified. When compared with the PE-2 it appears too large to be an LI-2 or IL-12. It definitely is not a TU-4 craft.
